

True North Imaging

Use of Support Persons Procedures

Objective- To outline True North Imaging's ("TNI") commitment to allowing persons with disabilities who require use of a support person to enter TNI locations, providing they do not pose safety concerns, and complete a consent form when required. Consent forms must be completed when discussing confidential information with the patient and where the support person will be present during those conversations (see attached consent form).

Definitions:

Support Persons: In relation to a person with a disability, a support person is a person who accompanies the person with a disability in order to help with communication, mobility, personal care, or medical needs or with access to goods or services.

Persons with disabilities who are accompanied by a support person have the right to have the support person accompany them while accessing services at TNI. Support persons are welcome in all areas of the clinic except where excluded by law for health and safety or privacy reasons, such as any area for Employee use only or any area where bio-hazard or radiation exposure occurs. Where a support person is excluded by law, TNI will explore alternative ways for the person with disabilities to access its services.

Eviction or Exclusion:

A support person may be evicted, excluded, or separated from the client if his/her actual behavior poses a direct threat to the health or safety of others, or if they refuse to sign the required Consent Form. These circumstances and rationale must be documented on an incident report form and provided to the location Supervisor, designate or VP Operations immediately following the incident.

Refer to Communication Procedure for further guidance on communicating with clients who use a support person.

Waiver of Rights:

If the client provides consent for the support person to be present as it relates to personal health information being shared, both the client and support person must sign the Consent Form. If the support person is informed of the risks related to being present during a procedure that may pose some risk (i.e., an x-ray), this consent must be included on the Consent Form, and a copy must be provided to the support person.
